Proportion of Health Center Patients Diagnosed with Diabetes

The proportion of health center patients diagnosed with diabetes ranges from 4.9% to 15.3% with a national average of 8.8%.

Health Center Patients with Uncontrolled Diabetes by Race/Ethnicity

Pacific Islanders, Native Hawaiians, and American Indians/Alaskan Natives are the three highest race/ethnicities with uncontrolled diabetes (HbA1c > 9%).

Trend of Uncontrolled Diabetes

The percentage of uncontrolled diabetes has consistently been lower than comparative national averages.
