

SCHOOL-BASED HEALTH CENTER CAPITAL PROGRAM— NOTICE OF AWARD

Frequently Asked Questions

The following questions and answers are organized by the following headings/topics for the FY 2013 awards made under the School-Based Health Center Capital Program (SBHCC). The SBHCC funding opportunity (HRSA-13-140) is available at <http://www.hrsa.gov/grants/apply/assistance/sbhcc/>.

CHANGE OF SCOPE—SBHCC GRANT	5
ADMINISTRATIVE AND POLICY REQUIREMENTS	5
REPORTING	6

GENERAL

1. Who do I contact to submit information and release conditions?

Deliverables can be submitted directly to HRSA’s Electronic HandBook (EHB). Please ensure that you upload the appropriate deliverable in response to a specific condition; this will ensure timely review and processing of your deliverable. For more information about registering in EHB and accessing post award submissions, please visit <https://grants.hrsa.gov/webExternal/help/hlpTOC.asp>.

For assistance using EHB or completing these submissions, please contact the BPHC Help Line at 1-877-974-BPHC (2742), or bphchelp@hrsa.gov.

For programmatic questions, please contact the Project Officer listed at the end of your Notice of Award (NoA).

2. Who is my Grants Management Specialist (GMS)? When should I contact the GMS?

Your contact in HRSA’s Division of Grants Management Operations (DGMO) is listed on the final page of the NoA. Contact the GMS for assistance with budget questions and if you have other questions pertaining to lease documentation, Landlord Letter of Consent, property documentation, Program Director changes, contracts/agreements, and Notices of Federal Interest.

3. Who is my Project Officer (PO)? When should I contact the PO?

Your PO is listed on the final page of the NoA. Contact the PO in order to resolve questions pertaining to environmental/historic preservation conditions, floor plans/site plans, scope of the project(s), budget, equipment list, and project site location.

TERMS AND CONDITIONS

4. How will pre-award costs be approved?

For approval of pre-award costs, recipients must submit a prior approval request through EHB that includes a description of the costs, invoices, and any other relevant documentation. Approval will be based on the nature of the cost, relevance of the cost to the project, and justification for the cost being incurred prior to the award date as presented in the project narrative and the budget justification.

5. Why does HRSA have to perform an environmental review of my project?

The National Environmental Policy Act (NEPA) establishes national environmental policy and goals for the protection, maintenance, and enhancement of the environment and it provides a process for implementing these goals within the federal agencies. Federal-wide regulations for the NEPA are found at 40 CFR Part 1500. HRSA's procedures (approved by the White House Council on Environmental Quality) can be found at HHS Grants Administration Manual (GAM) Part 30 (<http://www.hhs.gov/hhsmanuals/read/gam/part30/>).

6. Can SBHCC project(s) be started immediately?

Recipients should **NOT** start SBHCC project until **ALL** applicable conditions have been met. Costs that may be incurred prior to meeting all conditions of award can include expenses for completing architectural and engineering plans, meeting licensing and permitting requirements, historic preservation consultation with SHPO/THPO, and preparing the Environmental Assessment.

7. What if we need to change the Project Director on the SBHCC grant?

To request a change of Project Director, grantees may submit a Prior Approval request through the EHB to document the change.

BUDGET ISSUES

8. Will a revised NoA be issued for re-budgeting of costs or costs re-budgeted across line item categories?

The following scenarios generally require prior approval and may result in a revised NoA being issued:

- Any major change to a budget (greater than 25% of total budget or \$250,000, whichever is less);
- Funds being moved to a category that did not have any funding prior to the revised budget;
- Any modification to the project scope – purchasing additional or different equipment, changing the dimensions of a project, etc.

Before submitting a prior approval request, please contact the assigned Project Officer to discuss the appropriate steps for addressing any modifications to a project.

9. If a revised budget is needed, does it have to account for costs expected to be incurred during the next 24 months?

The budget should account for how SBHCC funds will be utilized for the 2-year project/budget period of the award. Any pre-award costs will need to be approved and sent separately to the appropriate GMS. SBHCC funds must be fully obligated within the 2-year project/budget period.

DRAWDOWN OF FUNDS

10. How soon can we draw down our funds?

FY 2013 SBHCC grantees may currently draw down funds for preparation costs (e.g., environmental assessment, architectural/ engineering permitting, SHPO/THPO consult) but may NOT draw down funds to pay for other costs until **ALL** conditions for a project on the NoA have been satisfied. Grantees should exercise caution before committing to a construction start date prior to completion of HRSA's review and approval to lift conditions.

FEDERAL INTEREST

11. What are the requirements for Federal Interest for minor renovation projects?

For minor renovation projects where the project cost (total project costs minus equipment costs) is less than \$500,000, a Notice of Federal Interest is not required to be filed. For leased properties, please keep a copy of the lease agreement and a letter from the landlord stating that the SBHCC grantee will maintain reasonable control of the property (i.e., showing reasonable access and use of the property for the required lease period) and that the site is consistent with the scope of the SBHCC project.

Recipients who are required to file a NFI (total project cost minus equipment costs exceeds \$500,000) must:

- File a Notice of Federal Interest with the appropriate jurisdictional records, and
- Submit a notarized and recorded copy of the NFI to the Grants Management Specialist through EHB.

NFIs must be filed prior to starting the construction or alteration/renovation project. A sample NFI is available for download at <http://bphc.hrsa.gov/policiesregulations/capital/>.

While alteration and renovation projects below \$500,000 do not require a Notice of Federal Interest on the property, there is still Federal Interest in real property as there is with equipment. It is expected that grantees will follow the following requirements regarding Federal Interest:

- 45 CFR 74.30 through 74.32 or 45 CFR 92.31
(http://www.access.gpo.gov/nara/cfr/waisidx_07/45cfr74_07.html and
http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?c=ecfr&tpl=/ecfrbrowse/Title45/45cfr92_main_02.tpl)
- HHS Grants Policy Statement S II-68, Real Property
(http://www.hhs.gov/grantsnet/docs/HHSGPS_107.doc)

12. If there is already a NFI on the same piece of property where the SBHCC project will occur, is the owner required to file another NFI?

If there is an existing HRSA NFI on the same piece of property, the NFI must be amended with the additional information related to the SBHCC grant award (grant number, purpose, etc.). This revised copy must be recorded with the appropriate jurisdictional records. A **notarized and recorded** copy of the revised NFI must be provided to the Grants Management Specialist via EHB. The NFI must be filed prior to starting the construction or alteration/renovation project.

13. Where do I file and record my NFI at the local level?

The NFI must be filed against the property deed. Property deeds are usually located at the County Courthouse, County Clerks, Register of Deeds, or other equivalent recordation offices. Some counties and offices may not be familiar with the NFI process, so grantees may need to explain that a NFI is essentially a Federal lien. Because the process and locations to file property related records varies greatly between jurisdictions, HRSA is unable to provide detailed information as to how the process works within each locality.

The NFI must be notarized AND recorded in the lands records office or Municipal records office BEFORE a copy is sent to HRSA. A copy of a filed NFI is needed in order to lift the condition from NoAs.

ENVIRONMENTAL CONSIDERATIONS

14. Is the draft Environmental Assessment (EA) project-specific? Since we are proposing alterations to a 10,000 square foot unit within a large existing facility, would an EA that was done earlier in 2009 for the entire facility be sufficient, or would we need to do an EA on the interior space to be used as a school-based health center?

EAs are project specific. Some grantees that proposed alteration/renovation projects received a condition on their award informing them if a draft EA is required or if they should consult with their Project Officer to determine if one is required. If it is required, the draft EA must be specific to the proposed SBHCC project. However, general information from the previous EA could serve as a base and provide much of the information that is required in the draft EA for HRSA. Additional technical assistance on the requirements of the draft EA can be found at <http://bphc.hrsa.gov/policiesregulations/capital/>.

15. One of the SBHCC grant conditions for our construction project requires us to submit a draft EA within 90 days of the award issue date, but we will not be able to meet this deadline. Can we get an extension of the 90 day deadline?

Grantees should submit the draft EA, if required, as soon as possible. If you are not able to meet the deadline, send an email to the Project Officer identified on the NoA with your request to extend the deadline and an explanation as to why the extension is necessary; please include your grantee organization name and C12 grant number in your message. Grantees may **NOT** begin the construction project until the draft EA has been approved by HRSA and the related condition(s) of award are lifted.

CULTURAL RESOURCE ASSESSMENT AND HISTORIC PRESERVATION

16. What if I know that my project does not have any historic value, is not affecting any historic preservation, or has no detrimental environmental impact?

Under the National Historic Preservation Act and the National Environmental Policy Act, grantees with construction projects are required to provide a letter from either the State Historic Preservation Office (SHPO) or Tribal Historic Preservation Office (THPO). This determination must be made by qualified officials regarding the property. For alteration/renovation projects, HRSA has done a preliminary review of projects and indicated, through a condition on the NoA, whether the SHPO/THPO consultation is required, or if the grantee needs to consult with their PO to make this determination.

17. Is a SHPO required for our project?

The SHPO is part of the Cultural Resource Assessment and Historical Preservation Review. If a grantee proposed a construction project, it is authorized to contact their State Historic Preservation Office (SHPO) and/or Tribal Historic Preservation Office (THPO) to obtain either:

- A letter indicating a finding of no adverse impact, or
- A draft Memorandum of Agreement (MOA) between the SHPO/THPO, grantee and HRSA detailing a plan to reduce the adverse effects. Upon approval by HRSA, it will be signed by all parties.

For A/R projects, please review the conditions in the SBHCC NoA to see if a SHPO/THPO consultation is required.

CHANGE OF SCOPE—SBHCC GRANT

18. What happens if we want to change our original SBHCC project that was approved in our application?

SBHCC projects must be implemented as they were proposed in the application since the SBHCC is a competitive funding opportunity. HRSA may take action to withdraw the approval and funds for the project(s) if it is determined that a project is ineligible or cannot be completed. Such circumstances could include, but are not limited to:

- (1) The identification of previously undocumented environmental or historic preservation issues that prevent a project from being carried out;
- (2) The determination that the project cannot be completed as proposed (e.g., information submitted through the required reporting indicates that the grantee's progress is insufficient with the approved scope, costs, or timeline presented in the application and that completion as proposed will not be possible); or
- (3) The determination that the grantee is non-compliant with a requirement of the application guidance (e.g., the SBHCC project is not separate and distinct from another federally-funded project; grantee does not resolve concerns to the satisfaction of HRSA).

ADMINISTRATIVE AND POLICY REQUIREMENTS

19. Where can I find more information about HHS regulations 45 CFR Parts 74 and 92 and other procurement requirements?

Information regarding HHS regulations at 45 CFR Parts 74 and 92 and other procurement requirements can be found at <http://bphc.hrsa.gov/policiesregulations/capital/>. This provides guidance on issues such as avoiding conflicts of interest, contracts pre-existing to the grant award, simplified acquisition, and competitive bidding.

20. What needs to be recorded if the grantee performs work through its facilities management staff (i.e., “force account labor”), and where does information need to be sent?

HRSA needs the following information identified in the Force Account Labor FAQs available at <http://bphc.hrsa.gov/policiesregulations/forcefaq.pdf>. Supporting documentation should be discussed with the PO prior to submission through the EHB.

21. I am in the process of receiving bids on medical equipment and other office equipment that we identified in our application. Does all equipment purchased need to be American made?

The Buy American provision only pertains to certain construction materials for public buildings and not privately owned buildings. Grantees will be notified in the NoA if this requirement pertains to their SBHCC award.

REPORTING

22. What are the reporting requirements listed in my NoA?

The Reporting Requirements section of the NoA lists out specific deliverables that are required of all SBHCC projects. These requirements, to include the Quarterly Progress Report (QPR), allow HRSA to monitor the progress of grantees and to ensure that projects are progressing as they were proposed in the SBHCC application. Failure to comply with these reporting requirements will result in deferral or additional restrictions of future funding decisions.

Information regarding the QPR is available at <http://bphc.hrsa.gov/policiesregulations/capital/>.
