	LAL Number	Application Tracking Number
Focus Area: Diabetes: Hemoglobin A1c (HbA1c) Poor Contro This field contains the content area description for each required areas when adding adding performance measures in the Addition	performance measure. Appli	
Performance Measure This field defines each performance measure.	Percentage of patients 18-75 years of age with diabete who had hemoglobin A1c > 9.0% during the measurement period.	
Target Goal DescriptionIn this field, applicants provide a description of the target goal.	By the end of the project period, decrease the percentage of adult patients with type 1 or 2 diabetes whose most recent HbA1c is greater than 9% from 65% to 55%.	
Numerator Description In the Clinical Performance Measures, the numerator is the number of patients that meet the criteria identified by the measure (e.g., patients in a specified age range that received a specified service). This field is pre-populated for all required measures.	Patients whose most recent HbA1c level performed during the measurement period is > 9.0% or who had no test conducted during the measurement period.	
Denominator Description In the Clinical Performance Measures, the denominator is all patients to whom the measure applies (e.g., patients in a specified age range, regardless of whether they received a specified service). This field is pre-populated for all required measures.	Only patients 18-75 years of age with a diagnosis of Type 1 or Type 2 diabetes should be included in the denominator of this measure; patients with a diagnosis of secondary diabetes due to another condition should not be included.	
Baseline Data In these fields, applicants provide current data.	Baseline Year: 2019 Measure Type: Percentage Numerator: 2600 Denominator: 4000 Calculated Baseline: 65%	
Projected Data (by End of Designation Period) This field provides the goal for the end of the three-year designation period.	55%	
Data Source & Methodology Applicants are required to identify a data source and discuss the methodology used to collect and analyze data.	Data Source: [X] EHR [_] Chart Audit [_] Other (If Other, please specify) :	
For Clinical Performance Measures, applicants must select the data source—EHR, Chart Audit, or Other (please specify)— before describing the methodology.	Data Source and Methodology Description: Audit of all applicable patient records utilizing EHR system installed in 2016. (Data run occurred 1/7/2020).

 Key Factor and Major Planned Action #1 All applicants must provide at least one contributing and one restricting factor. The Key Factor Type subfield requires applicants to select Contributing and/or Restricting factor categories. Applicants must specify at least one key factor of each type. The Key Factor Description subfield provides a description of the factors predicted to contribute to and/or restrict progress toward stated goals. The Major Planned Action Description subfield provides a description of the major actions planned for addressing key factors. Applicants must use this subfield to provide planned overarching action steps and strategies for achieving each performance measure. 	Key Factor Type: [X] Contributing [_] Restricting Key Factor Description: XYZ will offer a variety of pharmaceutical assistance programs, including the provision of free, discounted, or generic medications as well as medications through its 340B Federal Drug Pricing arrangement. At least 70% of diabetic patients are on a total of 3 to 8 medications because of co-morbidities and complications. The pharmaceutical assistance programs will improve compliance by helping relieve the financial burden of multiple prescribed medications. Major Planned Action Description: Increase education and outreach efforts to diabetic patients on using the pharmaceutical assistance programs to improve medication adherence and		
Key Factor and Major Planned Action #2	ultimately improve HbA1c. Key Factor Type: [] Contributing [X] Restricting Key Factor Description: Integrating Diabetes Collaborative activities into the current work flow remains challenging. The agency-wide team would like to meet more frequently, but providers have little allocated administrative time and full clinical schedules. Any additional system stress negatively affects patient care management. Major Planned Action Description: Implement daily huddles with the care team that includes time to share quality dashboard updates and discuss interventions to improve care delivery.		
Comments (optional)			
If the baseline is zero, provide an explanation and state when baselines will be available.			

Public Burden Statement: Health centers (section 330 grant funded and Federally Qualified Health Center look-alikes) deliver comprehensive, high quality, cost-effective primary health care to patients regardless of their ability to pay. The Health Center Program application forms provide essential information to HRSA staff and objective review committee panels for application evaluation; funding recommendation and approval; designation; and monitoring. The OMB control number for this information collection is 0915-0285 and it is valid until 3/31/2023. This information collection is mandatory under the Health Center Program authorized by section 330 of the Public Health Service (PHS) Act (<u>42 U.S.C. 254b</u>). Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to HRSA Reports Clearance Officer, 5600 Fishers Lane, Room 14N136B, Rockville, Maryland, 20857 or paperwork@hrsa.gov.
