

# Reference Guide for UDS Data Reports Available to Health Centers for Calendar Year 2024

## INTRODUCTION

This Reference Guide is a companion document to the calendar year (CY) 2024 Uniform Data System (UDS) data reports that are available to 330-funded awardees and look-alike (LAL) health centers through the electronic handbooks (EHBs). The reports provide calculations and summations of finalized UDS data at the individual health center level, as well as at the state and national levels. Please note: some reports, such as the Rollup Report and the Summary Report, are limited to health center and national-level data for Look-Alikes and Bureau of Health Workforce-funded health centers. Because the reports contain an extensive amount of information, presented in a variety of formats, the Reference Guide is meant to provide the user with information about the content and calculations of each report and how the information might be used.

The UDS data reports are intended to provide each health center with an analysis of their own organization's UDS data, as well as comparable statistics in some cases for the state, nation, and other levels. These reports offer more relevant performance data by focusing on specific statistics. The reports avoid judgmental assessments, presenting data without predetermined goals, thresholds, or expectations. High or low numbers do not inherently indicate good or bad performance.

Health center leadership is encouraged to review these reports as a valuable resource. They go beyond performance monitoring, offering data for strategic planning, grant applications, and community outreach. For reference guides for UDS data reports from prior years, please reach out to the UDS Support Center ([udshelp330@bphadata.net](mailto:udshelp330@bphadata.net)).

Below is a summary of each of the reports available, followed by a brief explanation of the calculation formulae, and the formula guides for each of the reports (with the exception of the UDS Rollup Report).

## AVAILABLE REPORTS

**UDS Health Center Trend Report** – This report compares the health center's performance for key performance measures with national and state averages over a 3-year period. The measures describe health center performance in three categories: Access, Quality of Care Indicators/Health Outcomes, and Financial Cost/Viability. A preliminary version of this report is available before the end of each reporting cycle. Health centers can access the final report for the national level, their state, and specific health center in August. PCAs and HCCNs can also access this report for national, and any state or all health centers within their states in August.

**UDS Health Center, State and National Summary Report** – This is a dashboard report intended to describe each health center in a statistical manner. Calculations of key measures are derived from the health center's current reporting on the UDS. The measures are broken out into two main categories: 1) Demographic and Clinical Data (Patients, Visits, Staffing and Clinical Information) and 2) Fiscal Information (Costs and Revenues), and provide an overall picture of the health center's performance in each of these areas. Health centers can access their preliminary UDS Summary Report as soon as they begin data entry for UDS during the reporting period. Health centers can access the final report for national, their state, and their own health center report in August. PCAs and HCCNs can also access this report for national, and any state or all health centers within their states in August.

**UDS Health Center Performance Comparison Report** – This report provides calculations of Quality of Care Indicators/Health Outcomes and Costs measures at different levels like health center, state, national, urban/rural, size, sites, special medically underserved populations, national percentiles (25th, 50th and 75th), and health center percentile. Health centers can access their UDS Health Center Performance Comparison report in September. PCAs and HCCNs can also access this report for all health centers within their states in September.

**UDS Rollup Report** – This report compiles annual aggregate data reported by health centers. Summary data are provided in the Rollup Report for all sections of the UDS, including patient demographics, socioeconomic characteristics, staffing, patient diagnoses and services rendered, quality of care, health outcomes, financial costs, revenues, and other health-center data. A preliminary version of this report is available in March. PCAs, HCCNs, and health centers can access this report for national or any state in August. (No formula guide provided.)

## CALCULATION FORMULAE

The remaining pages of this guide list the formula used to calculate the statistics for each line of the reports mentioned above. The formulae reference specific cells of the UDS Report by table, line, and column. In some instances, the reference has been abbreviated with T=Table, L=Line, and C=Column. For example, a formula containing T3B\_L8\_CA is referring to Table 3B, Line 8, Column A. Standard mathematical notations are used as follows:

- \* Multiply
- / Divide
- +
- Subtract
- ( ) Perform calculation in parenthesis first

'Grantee' used to denote Health Center Program awardees and look-alikes authorized by Section 330 of the Public Health Services Act.

UDS Health Center Trend Report				
Measures	Formula Description	2022	2023	2024
<b>Access</b>				
<b>Patients Served: Total Number</b>	Total Number of Patients	T4_L6_CA	T4_L6_CA	T4_L6_CA
<b>Patients Served: Medical</b>	Total Medical Patients	T5_L15_CC	T5_L15_CC	T5_L15_CC
<b>Patients Served: Dental</b>	Total Dental Services Patients	T5_L19_CC	T5_L19_CC	T5_L19_CC
<b>Total Visits</b>	Grand Total for (Clinic+ Virtual) Visits	(T5_L34_CB + T5_L34_CB2)	(T5_L34_CB + T5_L34_CB2)	(T5_L34_CB + T5_L34_CB2)

16-20	
>20	
<b><sup>2</sup>Special Medically Underserved Population Migratory and Seasonal Agricultural Workers:</b>	Special Medically Underserved Population Migratory and Seasonal Agricultural Workers category is based on whether or not Migratory Agricultural Workers/Seasonal Agricultural Worker patients account for $\geq 25\%$ or $<25\%$ of total Health Center patient population. Total Migratory and Seasonal Agricultural Workers or Dependent Patients / (Total Male Patients + Total Female Patients). Determination based on the formula: $T4\_L16\_CA/(T3A\_L39\_CA + T3A\_L39\_CB)$
25% or more patients	
Below 25% patients	
<b><sup>3</sup>Special Medically Underserved Population Homeless:</b>	Special Medically Underserved Population Homeless category is based on whether or not Homeless patients account for $\geq 25\%$ or $<25\%$ of total Health Center patient population. Total Homeless Patients/ (Total Male Patients + Total Female Patients). Determination based on the formula: $T4\_L23\_CA/(T3A\_L39\_CA + T3A\_L39\_CB)$
25% or more patients	
Below 25% patients	
<b><sup>4</sup>Healthy People 2030 Goals</b>	Refer to <a href="https://health.gov/healthypeople/objectives-and-data/leading-health-indicators">https://health.gov/healthypeople/objectives-and-data/leading-health-indicators</a> for more information. A dash indicates that the clinical measure does not exactly align with any existing Healthy People 2030 goals. Healthy People 2030 targets have been revised since calendar year 2022 UDS.
<b><sup>5</sup>Health Center Adjusted Quartile</b>	Health Center adjusted quartile results from a statistical model adjusting for special medically underserved populations, uninsured and minority patients, and EHR use. Clinical performance for each measure is ranked from Quartile 1, highest 25% of reporting health centers, to Quartile 4, lowest 25% of reporting health centers. Refer to the <a href="#">UDS Health Center Adjusted Quartile Ranking</a> for more details on the process.
