

## Table 3A: Patients by Age and Sex Assigned at Birth

### PURPOSE:

Table 3A is used to report the age and sex at birth of patients served by the health center. In combination with the other patient profile tables, it provides a picture of the demographics of those receiving services.

### CHANGES:

- Date to use to identify age: as of December 31, 2024.
- In addition to an aggregate UDS Report submission within EHBs, health centers submit certain de-identified patient-level data (UDS+), including Table 3A using Health Level Seven (HL7<sup>®</sup>) Fast Healthcare Interoperability Resources (FHIR<sup>®</sup>) standards version release 4 (R4) for UDS, for the data elements on the following tables:
  - Health centers will submit UDS+ data through (bulk) FHIR R4 APIs, using the [UDS+ FHIR Implementation Guide \(IG\)](#) as described in Appendix G of the [UDS Manual](#). Details on the minimum submission requirements will be announced on the [UDS Modernization Initiative](#) and the [Health Center Program Community](#) websites.

TABLE 3A — PATIENTS BY AGE AND SEX ASSIGNED AT BIRTH			
Line #	Age Groups	Male Patients (a)	Female Patients (b)
1	Under age 1	36	45
2	Age 1	41	35
3	Age 2	30	28
4	Age 3	55	43
5	Age 4	57	48
6	Age 5	64	48
7	Age 6	63	55
8	Age 7	34	36
9	Age 8	41	42
10	Age 9	50	30
11	Age 10	48	33
12	Age 11	52	32
13	Age 12	46	44
14	Age 13	69	34
15	Age 14	62	61
16	Age 15	46	55
17	Age 16	51	64
18	Age 17	44	59
19	Age 18	42	82
20	Age 19	50	108
21	Age 20	57	97
22	Age 21	71	115
23	Age 22	91	133
24	Age 23	83	134
25	Age 24	80	119
26	Ages 25-29	362	638
27	Ages 30-34	381	586
28	Ages 35-39	347	525
29	Ages 40-44	357	535
30	Ages 45-49	448	625
31	Ages 50-54	503	628
32	Ages 55-59	396	540
33	Ages 60-64	282	377
34	Ages 65-69	165	216
35	Ages 70-74	89	136
36	Ages 75-79	53	120
37	Ages 80-84	34	48
38	Ages 85 and over	22	58
39	<b>Total Patients</b> (Sum Lines 1-38)	4,802	6,612

For more detailed information see UDS Reporting Requirements for 2024 Health Center Data, pages 29, 35 – 38.

## Table 3A: Patients by Age and Sex Assigned at Birth

### KEY TERMS:

**TOTAL PATIENTS:** Individuals who have one or more face-to-face or virtual UDS-countable visits during the calendar year.

**VISIT:** A documented, face-to-face, or virtual contact between a patient and a licensed or credentialed provider who exercises independent, professional judgement in the provision of services. A virtual visit is provided using interactive synchronous audio and/or video telecommunication systems that permit real-time communication between a distant provider and a patient.

**GRANT-SPECIFIC PATIENTS:** Individuals who have had one or more UDS-countable visit(s), including virtual visit(s), supported by one of the special population grant programs (Health Care for the Homeless, Migrant Health Center, Public Housing Primary Care).

**PATIENTS' SEX AT BIRTH:** The sex reported on a patient's birth certificate.

**UNDUPLICATED COUNT:** Table 3A reflects an unduplicated count of patients, meaning that each patient is counted only once on this table regardless of the number of visits they had during the calendar year.

### TABLE TIPS:

- Table 3A is completed for the Universal Report and the grant specific reports (if applicable).
- Those patients who are included on a grant-specific report will also be included on the Universal Report.
- Age is calculated as of December 31 on Table 3A.

**Note:** Age is determined differently on the non-prenatal portions of Tables 6B and 7. For this reason, there are additional criteria to consider when reporting clinical measure universes/denominators data for Tables 6B and 7. The numbers are not expected to be an exact match across the tables.

### CROSS-TABLE CONSIDERATIONS:

- Patients by Zip Code, Table 3A (Age and Sex Assigned at Birth), 3B (Demographic Characteristics), and Table 4 (Selected Patient Characteristics) describe the same patients and the totals must be equal.
- If you are reporting grant patients, the total number of patients reported on the grant table must be less than or equal to the corresponding number on the Universal Table for every cell. For example, you cannot report more 30- to 34-year-old migrant health patients than you report total patients ages 30-34.

## Table 3A: Patients by Age and Sex Assigned at Birth

### SELECTED CALCULATIONS:

- Children:** To calculate the total number of children, which is described as patients between year 0 and 17, sum lines 1-18, Column a plus Column b in Table 3A. Here, you see we arrive at 1,681 total children.
- Adults:** To calculate the total number of adults which is described as patients between 18 and 64, sum Table 3A, Lines 18 through 33, Column a plus Column b for a total; of 8,792 adult patients.
- Older Adults:** To calculate the total number of older adults served, which is described as patients aged 65 and above, sum Table 3A, Lines 34 to 38, Column a plus Column b, for a total of 941 older adult patients.

Line #	Age Groups	Male Patients (a)	Female Patients (b)
1	Under age 1	36	45
2	Age 1	41	35
3	Age 2	30	28
4	Age 3	55	43
5	Age 4	57	48
6	Age 5	64	48
7	Age 6	63	55
8	Age 7	34	36
9	Age 8	41	42
10	Age 9	50	30
11	Age 10	48	33
12	Age 11	52	32
13	Age 12	46	44
14	Age 13	69	34
15	Age 14	62	61
16	Age 15	46	55
17	Age 16	51	64
18	Age 17	44	59
19	Age 18	42	82
20	Age 19	50	108
21	Age 20	57	97
22	Age 21	71	115
23	Age 22	91	133
24	Age 23	83	134
