Calendar Year 2021 Uniform Data System (UDS) Reporting Changes Webinar

May 6, 2021

Ellen Radis
Senior Program Manager, Advocates for Human Potential, Inc.
Bureau of Primary Health Care (BPHC)

Vision: Healthy Communities, Healthy People
Opening Remarks

Judy Van Alstyne, MPH
Data and Evaluation Division
Office of Quality Improvement
Bureau of Primary Health Care
Health Resources and Services Administration
Agenda

• Reporting Clarifications
• Changes to Calendar Year 2021 UDS Reporting
• Resources and Updates
• Strategies for Successful Reporting
• Questions and Answers
Objectives of the Webinar

• Understand the major changes for Calendar Year (CY) 2021 UDS data collection and reporting (due February 15, 2022).
• Understand the resources available to support CY 2021 UDS reporting.
Calendar Year 2021 UDS Changes

For UDS Reports due February 15, 2022
Communication of UDS Reporting Changes

• 2021 UDS changes were first announced as “Uniform Data System Changes for Calendar Year 2021” in Program Assistance Letter (PAL) 2020-07 issued October 21, 2020.

• Changes discussed today will be described in further detail in the:
  ▪ 2021 UDS Manual
  ▪ Technical assistance webinars (Fall 2021)
  ▪ Annual UDS trainings co-hosted with primary care associations (PCAs) (October-December 2021)

• Training information will be announced this fall in the Primary Care Digest and the UDS webpages.
Effective Dates

- Changes impact UDS reports for in-scope activities for 2021:
  - Effective **January 1, 2021** (and must be reflected in data reported for the entire year).
  - To be reported by **February 15, 2022** (and submitted through the Electronic Handbooks [EHBs]).

- In order to ensure data are collected correctly, health centers should:
  - Configure systems to capture and report new data elements.
  - Work with electronic health record (EHR) vendors to ensure systems are updated with required specifications.
  - Validate data to ensure that workflows are successfully capturing data.
  - Educate health center staff involved with UDS reporting on 2021 UDS changes, as appropriate.
Reporting Clarifications
### Alignment with eCQMs

Tables 6B and 7 were updated to align with the latest Centers for Medicare & Medicaid Services (CMS) electronic-specified clinical quality measures (eCQMs).

<table>

</tbody>
</table>

Note: Dental Sealants for Children measure is in draft form (CMS277v0) and ischemic vascular disease (IVD) specifications are no longer updated by the measure stewards (CMS164v7). These versions should continue to be used for 2021 reporting.
2021 Performance Period Eligible Professional/Eligible Clinician (EP/EC) Resources

- **eCQM Flows**: Workflows for each eCQM that is updated annually and downloads as a ZIP file.
- **Guide for Reading eCQMs v5.0**: A guide for stakeholders to understand eCQMs including advice on how to read the various eCQM components.
- **eCQM value sets**: Brings you to the VSAC site where you can search value sets.
- **Additional resources available on the EP/EC Resources Page**.

The eCQM Flows are flowcharts designed to assist in interpretation of the eCQM logic to support reporting. These flows provide a visual overview of the data components used to define denominators, numerators, exclusions, and exceptions. They can be used as measure planning or training tools.
Clinical Measures: Definitions

• eCQMs follow the workflow as defined in the CMS specifications.
  • Denominator (universe): Patients who fit the detailed criteria described for inclusion in the specified measure to be evaluated.
  • Numerator: Records (from the denominator) that meet the measurement standard for the specified measure.

• Most clinical measures reported in the UDS have documented exclusions and exceptions.
  ▪ Denominator Exclusions: Patients not considered for the measure and who should be removed from the denominator before determining if numerator criteria is met.
  ▪ Denominator Exceptions: Patients removed from the denominator because numerator criteria are not met.
    ▪ 2021 Exclusions and Exceptions Resource developed to assist with clinical measure reporting.
Health centers serve lots of people in lots of different ways. Not all of those people will count as a “patient” for the purposes of the UDS.

- **Patient**: A person who has at least one *countable* visit in one or more service category during the reporting year.

- In the patient profile tables (ZIP Code Table and Tables 3A, 3B, and 4), *each person counts once* regardless of the number of visits or services received.

- These will be same patients that are also reported on Tables 5, 6A, 6B and 7.
COVID-19: Implications on UDS Reporting

• Visits where an individual only receive(s/d) the COVID-19 screening test or vaccination are not considered a UDS countable visit.

• For UDS reporting purposes:
  ▪ Do not report individuals who receive(d) a COVID-19 screening test or vaccination only.
  ▪ Report individuals (and their services) only when:
    ✓ They require(d) independent professional judgement from a licensed or credentialed provider, and
    ✓ The visit is documented, and
    ✓ Provided in-person or virtually to the individual patient.

• Report virtual visits that are conducted during the COVID-19 pandemic only if they are provided using interactive, synchronous audio and/or video telecommunication systems that permit real-time communication between the provider and a patient.
COVID-19: Additional Reporting Information

- CMS-expanded telehealth services for Medicare beneficiaries (beyond UDS reporting). Learn more.
  - CPT code 99201 does not meet the documentation and decision-making criteria for a countable UDS visit.
  - See E/M updates for more information.
Details of Major 2021 UDS Changes
### Table 6A: New Data Collected

**Selected Diagnoses and Services Rendered**

- New line 24b: Coronavirus (SARS-CoV-2) vaccine
  - Column a = Number of visits at which the SARS-CoV-2 vaccine was administered to health center patients.
  - Column b = Number of patients who have had one or more visits where SARS-CoV-2 vaccine was administered.
  - Removed from Appendix E: Other Data Elements (ODE) form (reported here in 2020).

</tr>
</tbody>
</table>

2021 Table 6A code changes **available for download.**

*Codes are updated as of March 2021.*

If necessary, codes may be updated later in the year to capture critical updates made after this date.
Table 6B: Existing Measure Modified

Tobacco Use: Screening and Cessation Intervention (CMS138v9)

• Revised timeframes for numerator from 24 to 12 months.
• Revised timing associated with performing a tobacco cessation intervention in the numerator. Removes constraint that the intervention occur after the most recent tobacco use screening during which the patient was identified as a tobacco user and ties these actions to the measurement period.

<table>
<thead>
<tr>
<th>2020</th>
<th>2021</th>
</tr>
</thead>
</table>
| • Patients who were screened for tobacco use at least once within 24 months.  
• Patients who received tobacco cessation intervention.  
• Patients who were screened for tobacco use at least once within 24 months AND who received tobacco cessation intervention if identified as a tobacco user. | • Patients who were screened for tobacco use at least once within 12 months.  
• Patients who received tobacco cessation intervention.  
• Patients who were screened for tobacco use at least once within 12 months AND who received tobacco cessation intervention if identified as a tobacco user. |
Table 6B: Existing Measure Modified

Cervical Cancer Screening (CMS124v9)

- **Numerator** revised to align with updated clinical recommendations.
  - For patients age 30 years and older, permits human papillomavirus (HPV) testing alone every 5 years.
  - Updated description removes cytology and co-testing for women age 30–64 and replaces “every” with “within the last.”

Resources and Updates
2021 UDS Manual Stylistic Changes

Updates to the 2021 UDS Manual include:

• Single column layout format.
• Consistent terminology.
• Updates to text style and content presentation.
• Frequently Asked Questions (FAQs) moved to their respective chapters.
2021 eCQM Website Updated

1. Clear description of measure

2. Easier to access the specifications

3. Changes described

Note: The Electronic Clinical Quality Improvement (eCQI) Resource Center website is sponsored and maintained by CMS.
Strategies for Successful Reporting
Follow UDS Guidance

- Thoroughly read definitions and instructions in the 2021 UDS Manual.
- Other available guidance:
  - eCQI Resource Center
  - PAL
- Other supports include:
  - Value Set Authority Center (VSAC)
    - Same username and password as USHIK.
  - UDS training website (webinars, e-learning modules, Table 6A code changes, clinical measures handout, and more)
- Contact UDS Support by email (udshelp330@bphcdata.net) or by calling 866-837-4357 if you have questions.
  - The help line is available year-round from 8:30 a.m. to 5:00 p.m. (ET).
Work as a Team

• Tables are interrelated.
  ▪ Communicate with your UDS data preparation team.
  ▪ Review data across tables to ensure data are consistent and reasonable.
  ▪ Review changes in performance to validate accuracy and to identify potential quality improvement initiatives.

• Use available tools.
  ▪ Preliminary Reporting Environment (PRE) will be available Fall 2021.
  ▪ The modernized reporting features—Excel file, offline HTML file, comparison tool, and the Excel mapping document—are all available in the PRE to help prepare you for UDS data reporting.

• Check data for accuracy.
  ▪ Work with your EHR vendor to understand data output and to verify that calendar year updates have been programmed.
  ▪ Check data trends and relationships across tables: are the data reasonable? Previous year UDS data can be compared in the EHBs with the Data Comparison tool.
Health centers must demonstrate compliance with these requirements:

- The health center has a system in place to collect and organize data related to the HRSA-approved scope of project, as required to meet HHS reporting requirements, including those data elements for UDS reporting.
- The health center submits timely, accurate, and complete UDS reports in accordance with HRSA instructions and submits any other required HHS and Health Center Program reports.

Complete, accurate, and on time!
Available Assistance

• Technical assistance materials, including local trainings, are available online:
  ▪ HRSA Health Center Program website and UDS training website
• UDS Support Center for assistance with UDS reporting questions:
  ▪ udshelp330@bphcdata.net
  ▪ 866-UDS-HELP (866-837-4357)
• Health Center Program support

• EHBs Support
  ▪ UDS Report and preliminary reporting environment access (in EHBs)
  ▪ EHBs system issues: 877-464-4772, Option 1
  ▪ EHBs account access and roles: 877-464-4772, Option 3
• ONC Issue Tracking System (OITS) JIRA project eCQM Issue Tracker
  ▪ OITS account sign up
• National Training and Technical Assistance Partners
UDS Webinars

• Additional technical assistance webinars will occur in the fall.
• Past webinar presentations are archived on HRSA’s UDS Resources page.
