

# UDS Modernization 2018 – Training Session

Presentation to Training Participants  
*October 31, 2018*

- **Shailee Sharma**
- **Senior Business Analyst**
- **REI Systems**

# Agenda

---

- Introduction
- Uniform Data System (UDS) Modernization Initiative
  - Content modernization
  - Process modernization
  - Why modernize process of UDS reporting?
- New Optional Reporting Features
  - Overview
  - Demonstration
  - Feature details
- Technical Support
- Appendices
- Questions

# UDS Modernization Initiative

# UDS Process Modernization – Why?

Manual entry for large set of data points

Fixed and short timeframe for data entry

Large number of edits to validate data accuracy

Requires user to be logged into Electronic Hand Books (EHBs)

# New Features

---

# UDS Process Modernization – New Features

## Forms Modernization

- New and modern look and feel of the UDS forms
- Ease of data entry
- Fewer clicks to enter and save data
- Immediate data validations and easy clearing of the edits

## Preliminary Reporting Environment (PRE)

- System available to users, who wish to utilize it, prior to January 1<sup>st</sup> to prepare report for submission.
- Additional time to enter data and work on edits
- Improved data quality with extra time
- Early system availability provides opportunity to users to familiarize with UDS forms enhancements ahead of reporting time frame

# UDS Process Modernization – New Features (contd.)

## Offline Excel Feature

- Users can download **Offline Excel files** to facilitate offline data entry and transporting from other Excel files.
- **Offline Excel file matches the UDS forms structure** ( row/column labels, auto-calculated fields)
- On completion of data entry user can **upload** the file into EHBs to populate data on the forms
- On **Successful upload, an error file** is generated to report on all applicable edits based on the data in the uploaded file.

## Offline HTML Feature

- Users can **Download HTML package** to facilitate offline data entry
- Download can be for **entire report or selective tables**
- **Offline forms** are a mirror image of **UDS forms** in EHBs including the **edits**
- Users can use **Import** feature for data entry or **manually enter data** on the forms
- On completing data entry users can **Export** the data into Offline Excel file and **Upload** into EHBs

# UDS Process Modernization – New Features (contd. 2)

## Multiparty Reporting

- Users can download Offline Excel/ Offline HTML either at **entire report level or selective tables level**
- On Upload users can access **errors** reported only for the uploaded forms, if the data uploaded results in any edits.
- **Multiple people** from a health center can work independently on separate UDS forms simultaneously.

## Excel Mapping Document

- Easily accessible and downloadable **Excel file**
- Provides **easy mapping** to forms/rows/columns/**cell address** in downloadable Excel file.
- To support health centers with **automating data population** in downloaded Excel file.

# Demonstration of New Optional Features

## New Features – Details

# Modern Forms

## Modern Forms

- Users will view the UDS forms with a **modernized interface**
- Users will see additional information in the **Status Overview** section
- Users will have **easy access** to most frequently used report actions
- Users will see data **edits/validations** on the form as they enter data, these validations will be cleared as users correct the data
- The system will automatically **mark the forms as complete** when edits are cleared, resulting in **fewer clicks** by eliminating mark as complete action

# Offline Excel Feature – Download

## Excel File Download

- Users will be able to download an **Offline Excel** file from the EHBs
- Users can save the downloaded file onto their local system and **enter data offline**
- Users can **select tables** or **entire report** to download
- Downloaded file will have a **system generated filename** and **dynamic funding stream tabs for selected tables**

# Offline Excel Feature – Upload

## Excel File Upload

- Users will be able to **upload** the file. The EHBs will **verify the file format, tabs, and structures** before accepting the file
- The EHBs will assign a **unique filename** on upload. This will have the Bureau of Primary Health Care's Health Center Management Information System Identification Number (**BHCMISID**) and **Version Number**
- On **successful upload**, the UDS forms will be populated with the data from the file

# Offline Excel Feature – Error File

## Error File

- On successful upload the EHBs generates an **Error file**, listing errors specific to data in the uploaded file
- The Error file is displayed in the **error summary section** with a **system assigned name** which includes the **BHCMISID** and **Version Number**
- The **Error Summary section** also displays a **count of edits** reported in the **error file**
- All **page level validations** for each table will be fired first to avoid uploading data that is not acceptable

# Offline Excel Feature – Upload History

## Upload History

- Users can access the **upload history** page from the resource section
- All previously uploaded files will be listed as **newest to oldest**, only for **current reporting year**
- Users can download these files by clicking on filenames displayed as **hyperlinks**

# Offline Excel Features – Interesting Facts

## Interesting Facts

- There is **no restriction** on the number of times a file can be uploaded or downloaded.
- An **Uploaded file** and associated **Error file** will always have the same **version number**
- **Version number** is **increased by 1** with each successful upload (e.g. v1, v2, etc.)
- The EHBs will maintain only **one error file** at a time, generated on last successful upload

# Offline Excel Feature – Excel Mapping Document

## Excel Mapping Document

- Users will be able to **download** an Excel document
- Users will see **details** referring to worksheet **name** and **cell address**
- The **additional details** for providing clarity are associated with **UDS form's row number, row name, column name**
- Users can use the **cell address** mapping to automate the data population in Excel template

# Offline HTML Feature - Download

## Offline Package Download

- Users will be able to download an **Offline HTML** package from the EHBs
- User can **select tables** or **entire report** to download in **HTML format**
- Users can **save** the package onto their local system and then **extract** files to work with them
- The downloaded package will have multiple files, user should click on **UDS-Submission** HTML files to access the offline forms

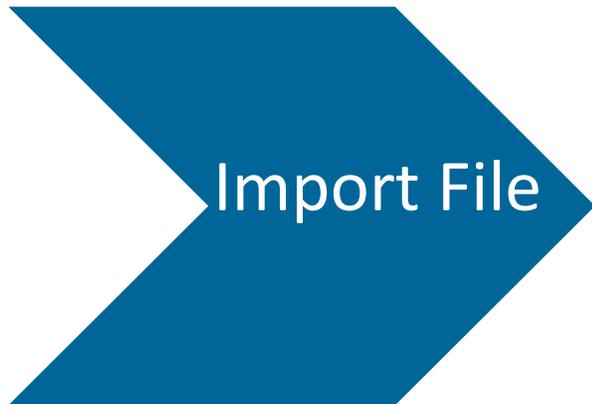

# Offline HTML Feature – Data Entry

## Data Entry

- **Offline HTML** forms will have the **same look and feel** as the UDS forms in the EHBs
- Users will be able to **navigate** to different forms using the left navigation menu
- Data entered will result in **data edits appearing** on the forms, similar to EHBs forms

# Offline HTML Feature – Import File

- Users have an alternate way to enter data in the offline forms using the **import** function
- Users can import an Excel file which is **populated with data**
- On successful import of the Excel file all data from the file overwrites the existing data in the offline forms

# Offline HTML Feature – Export File

- Once data entry is complete users can **export** the UDS forms into an **Offline Excel file**
- All data entered in the forms would be **exported** onto the **Offline Excel file**
- Users can use the **exported Excel file** for different purposes such as to **upload** back into the EHBs or for internal review or for report consolidation

# Offline HTML Feature – Interesting Facts

## Interesting Facts

- There is **no restriction** on the number of times a package can be **downloaded**
- **Downloaded offline forms** open in **Chrome** browser only
- There is **no restriction** on the number of times Excel files can be **imported** or **exported**
- Exported **Excel files** will match the offline package structure , such as entire report or a select few tables

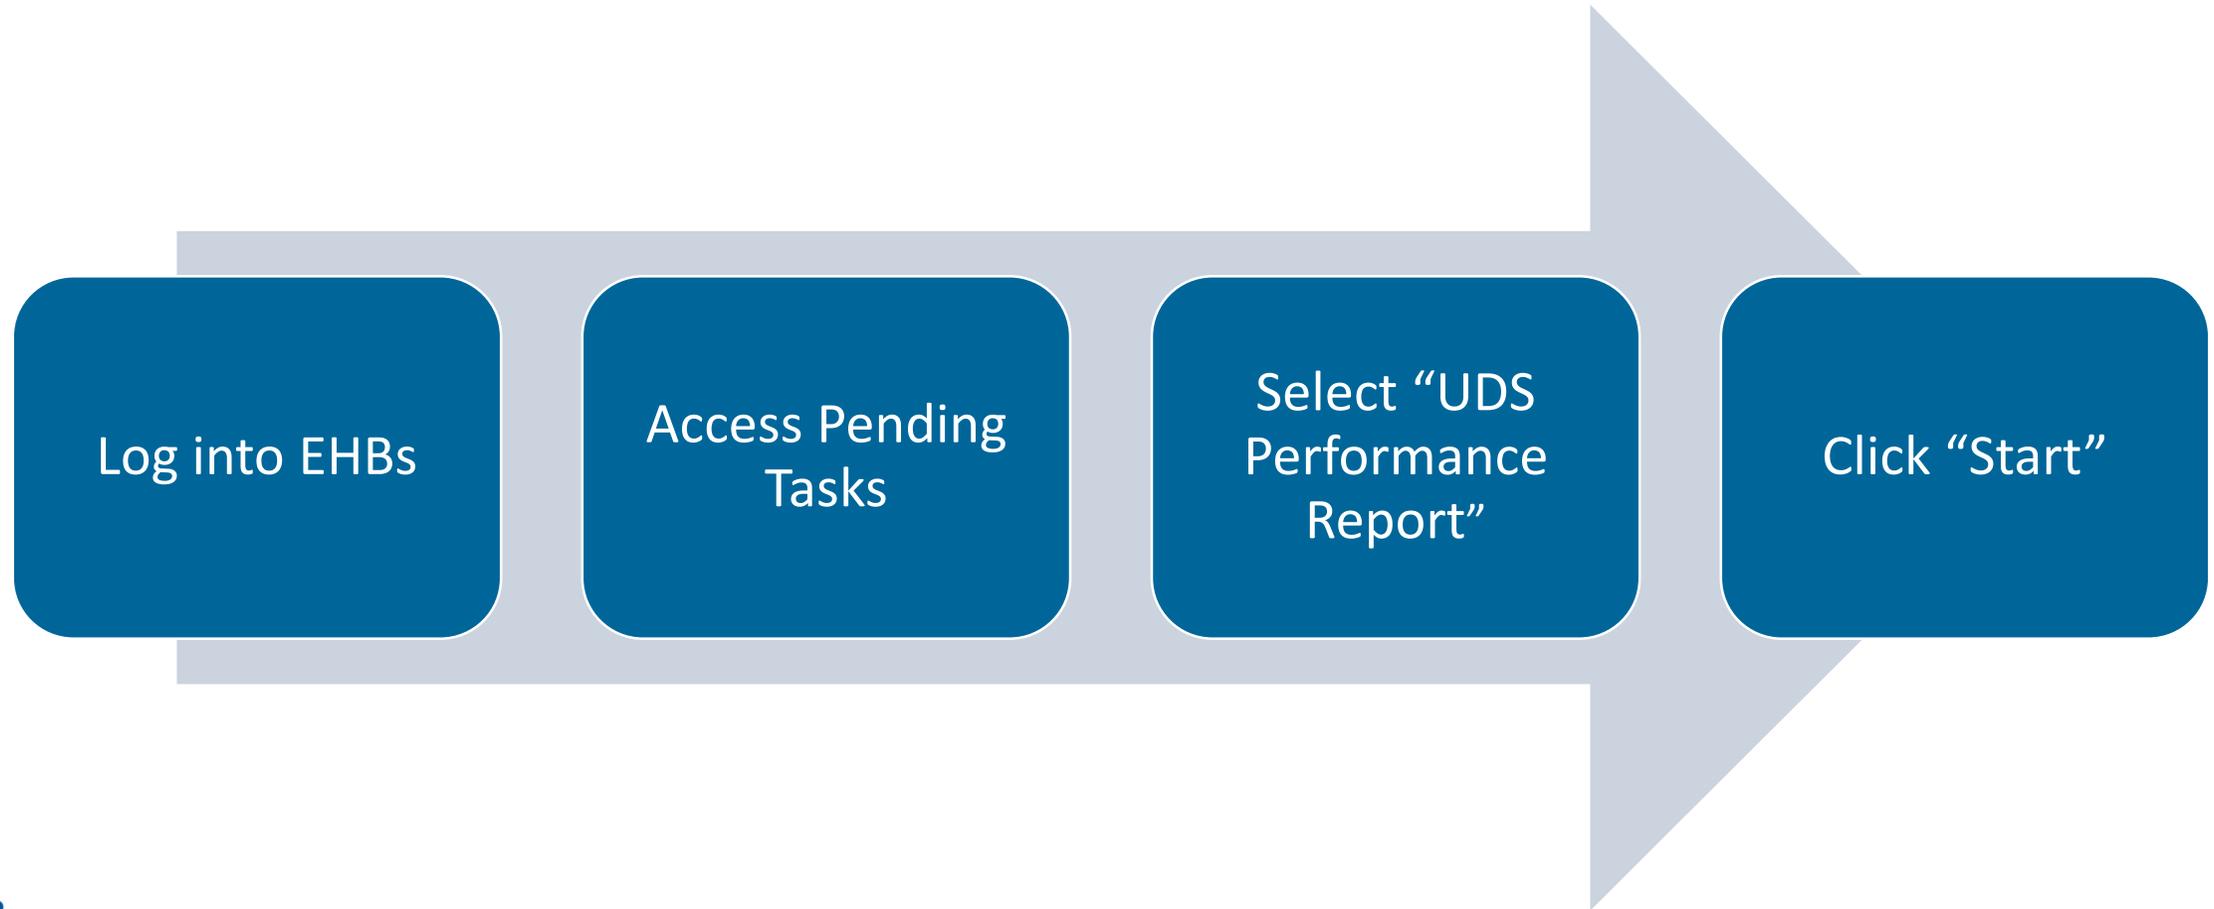

# Technical Support
