I. BACKGROUND

This Program Assistance Letter (PAL) provides an overview of proposed changes to the Health Resources and Services Administration's (HRSA) calendar year (CY) 2022 Uniform Data System (UDS) to be reported by Health Center Program awardees and look-alikes in February 2023. Additional details regarding these updates will be expounded in the forthcoming 2022 UDS Manual.

II. PROPOSED UPDATES FOR CY 2022 UDS REPORTING

A. UPDATE QUALITY OF CARE MEASURES TO ALIGN WITH E-CQMS: TABLES 6B AND 7

To support efforts across the federal government that standardize data collection and reduce reporting burden for entities participating in federal programs with data reporting mandates, the following UDS clinical quality measures (CQMs) have been aligned with the versions of the Centers for Medicare and Medicaid Services (CMS) electronic-specified clinical quality measures (eCQMs) designated for the 2022 reporting period. Alignment of UDS CQMs with CMS eCQMs most notably pertains to the measures captured in UDS Tables 6B and 7, illustrated in the tables below.

Rationale: Data-driven quality improvement efforts and full optimization of electronic health record (EHR) systems are strategic priorities for the Health Center Program. Clinical performance measure alignment across national programs promotes data standardization and quality, and decreases reporting burden. Additionally, measure alignment and harmonization with other national quality programs, such as the [National Quality Forum](#) (NQF) and the CMS [Quality Payment Program](#) (QPP), remains a federal priority. Hyperlinks to the Electronic Clinical Quality Improvement (eCQI) Resource Center have been included to provide additional details of the eCQM reporting requirements.
