Ending the HIV Epidemic-Primary Care HIV Prevention (PCHP) funding has three goals:

- Increase the number of patients counseled and tested for HIV.
- Increase the number of patients prescribed pre-exposure prophylaxis (PrEP).
- Increase the percentage of patients newly diagnosed with HIV who are linked to care and treatment within 30 days of diagnosis.

What area do you feel has been the biggest challenge for your organization? What are some of the obstacles you are facing in implementing this part of the award?
