Public Burden Statement: Health centers (section 330 grant funded and Federally Qualified Health Center look-alikes) deliver comprehensive, high quality, cost-effective primary health care to patients regardless of their ability to pay. The Health Center Program application forms provide essential information to HRSA staff and objective review committee panels for application evaluation; funding recommendation and approval; designation; and monitoring. The OMB control number for this information collection is 0915-0285 and it is valid until 4/30/2026. This information collection is mandatory under the Health Center Program authorized by section 330 of the Public Health Service (PHS) Act ([42 U.S.C. 254b](#)). Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other

Instructions

1. Applicant Information

- Select the Fiscal Year End Date for your organization's fiscal year (e.g., January 31).
- Check only one category for the Business Entity. Make sure the selection aligns with the type entered in [SAM.gov](https://sam.gov).
 - If you are a Tribal or Urban Indian entity, always select the Tribal or Urban Indian category.
- You may select more than one category for the Organization Type.

2. Proposed Service Area

a. Service Area Designation

- If you are applying for Community Health Center (CHC) funding (as noted in Section A of the SF-424A: Budget Information form), you MUST serve at least one Medically Underserved Area (MUA) or Medically Underserved Population (MUP).
- Select the MUA and/or MUP designations for the proposed service area and enter the identification number(s).
- To find out if all or part of your service area is located in a designated MUA or MUP, see <https://data.hrsa.gov/tools/shortage-area/mua-find> or <https://data.hrsa.gov/tools/shortage-area/by-address>.
- To learn more about MUAs or MUPs, see [What is Shortage Designation?](#) or email sdb@hrsa.gov.

b. Service Area Type

- Select the type (urban or rural) that describes the majority of the service area. For information about rural populations, visit the Office of Rural Health Policy's website at <https://www.hrsa.gov/rural-health/about-us/what-is-rural>.
- If rural is selected, you may further choose sparsely populated, if applicable, and provide the number of people per square mile (value must range from 0.01 to 7). To find out if your site address zip code is located in a frontier and remote (FAR)¹ area, see <https://www.ruralhealthinfo.org/am-i-rural>.

c. Patients and Visits

General Guidance for Patient and Visit Numbers: When providing the number of patients and visits within each service type or population type category, note the following (see the [Uniform Data System \(UDS\) Manual](#) for detailed information):

- A visit is an individual² in-person or virtual³ encounter between a patient and a licensed or credentialed provider who exercises independent, professional judgment in providing services. To be included as a visit, services must be paid for by your organization (Form

¹ See <https://www.ers.usda.gov/data-products/frontier-and-remote-area-codes> for more information about FAR areas.

² An exception is allowed for behavioral health visits, which may be conducted in a group setting.

³ Only interactive, synchronous audio and/or video telecommunication systems that permit real-time communication between a distant provider and a patient may be considered and coded as telehealth services.

5A: Services Provided, Columns I and/or II) and documented in a written or electronic form in a system that permits ready retrieval of current data for the patient.

- A patient is an individual who had at least one visit in 2023 (UDS/Baseline Value) or is projected to have at least one visit in 2026 (Projected by December 31, 2026).
- Since a patient must have at least one documented visit, the number of patients cannot be more than the number of visits.
- Report aggregate data for all service sites in the proposed project.
- Do not include patients and visits for pharmacy services or services outside the proposed scope of project.
- Make your projections consistent throughout the application.

Unduplicated Patients and Visits by Population Type: The population types in this section do NOT refer only to the requested funding categories in Section A of the SF-424A: Budget Information form. For example, if you are applying for only CHC funding (General Underserved Community), you may still have patients/visits reported in the other population type categories. **All patients/visits that do not fall within the Migratory and Seasonal Agricultural Workers and Families, Public Housing Residents, or the People Experiencing Homelessness categories must be included in the General Underserved Community category.**

- 1) Project the number of unduplicated patients to be served in calendar year (CY) 2026 (January 1 through December 31, 2026). This value will pre-populate in the corresponding cell within the table below this field.
- 2) Current values will pre-populate from the 2023 UDS data: total patients, patients across population type categories, and total visits. Provide the number of 2023 visits across the population type categories to establish a baseline.
- 3) The total number of unduplicated patients projected in CY 2026 (January 1 through December 31, 2026) will pre-populate from Item 1 above. Project the **total** number of visits in CY 2026 (January 1 through December 31, 2026). Then categorize the projected number of patients and visits for each population type category. **Across all population type categories, an individual can only be counted once as a patient.**

Patients and Visits by Service Type: A person who receives multiple types of services should be counted once for each service type (e.g., someone who receives both medical and dental services should be counted once for medical and once for dental). This section does not have a row for total numbers since a patient may be included in more than one service type category.

- 1) Current patients and visits for each service type category will pre-populate from the 2023 UDS data.
- 2) Project the total number of patients and visits anticipated within each service type category in CY 2026 (January 1 through December 31, 2026). Projections should include virtual and face-to-face visits.
