

FY 2019 Integrated Behavioral Health Services (IBHS) Example Patient Impact Form

The following example of a completed Patient Impact Form reflects a scenario in which a health center projects to use IBHS funding to primarily impact its existing patients. Refer to Appendix B of the IBHS Instructions for detailed guidance on completing this form.

Existing Patients

- **100** patients will newly access SUD services only (counted in questions [1](#) and [2A](#))
- **125** patients will newly access mental health services only (counted in questions [1](#) and [2B](#))
- **75** patients will newly access both SUD and mental health services (counted in questions [1](#), [2A](#), [2B](#))

New Patients

- **25** new patients will access SUD services only (counted in questions [3](#) and [4A](#))
- **10** new patients will access mental health services only (counted in questions [3](#) and [4B](#))
- **10** new patients will access both SUD and mental health services (counted in questions [3](#), [4A](#), [4B](#))

Existing Patient Impact	
1. Total Unduplicated Existing Patients This projection counts each existing patient only once, even if some patients are expected to access both SUD and mental health services. It includes 100 SUD-only existing patients + 125 mental health-only existing patients + 75 existing patients accessing both SUD and mental health services.	300
2. Existing Patients by Service Type: In 2A and 2B below, count patients according to the services that you expect them to access. If a patient will access both services, count the patient once for SUD and once for mental health.	
A. SUD Services Patients This projection includes 100 SUD-only existing patients + 75 existing patients accessing both SUD and mental health services.	175
B. Mental Health Services Patients This projection includes 125 mental health-only existing patients + 75 existing patients accessing both SUD and mental health services.	200
New Patient Impact	
3. Total Unduplicated New Patients This projection counts each new patient only once, even if some patients are expected to access both SUD and mental health services. It includes 25 SUD-only new patients + 10 mental health-only new patients + 10 new patients accessing both SUD and mental health services.	45

4. New Patients by Service Type	
A. SUD Services Patients This projection reflects 25 SUD-only new patients + 10 new patients accessing both SUD and mental health services.	35
B. Mental Health Services Patients This projection reflects 10 new mental health-only patients + 10 new patients accessing both SUD and mental health services.	20
5. New Patients by Population Type	
These projections describe the new unduplicated patients by Health Center Program population type, therefore the sum will equal item 3, Total Unduplicated New Patients.	
A. Community Health Centers	20
B. Migrant Health Centers	10
C. Health Care for the Homeless	15
D. Public Housing Primary Care	0
