Ending the HIV Epidemic: A Plan for America

**GOAL:**
HHS will work with each community to establish local teams on the ground to tailor and implement strategies to:

- **Diagnose** all people with HIV as early as possible.
- **Treat** people with HIV rapidly and effectively to reach sustained viral suppression.
- **Prevent** new HIV transmissions by using proven interventions, including pre-exposure prophylaxis (PrEP) and syringe services programs (SSPs).
- **Respond** quickly to potential HIV outbreaks to get needed prevention and treatment services to people who need them.

75% reduction in new HIV infections in 5 years and at least 90% reduction in 10 years.
Purpose

• Expand HIV prevention services that decrease the risk of HIV transmission
• Target geographic locations identified by Ending the HIV Epidemic initiative
• Focus on supporting access to and use of PrEP

$250,000 base amount
$0.50 per patient (2018 UDS data)
$2 per patient tested for HIV (2018 UDS data)
