**Comments/Explanatory Notes (if applicable)**

Public Burden Statement: Health centers (section 330 grant funded and Federally Qualified Health Center look-alikes) deliver comprehensive, high quality, cost-effective primary health care to patients regardless of their ability to pay. The Health Center Program application forms provide essential information to HRSA staff and objective review committee panels for application evaluation; funding recommendation and approval; designation; and monitoring. The OMB control number for this information collection is 0915-0285 and it is valid until 3/31/2023. This information collection is mandatory under the Health Center Program authorized by section 330 of the Public Health Service (PHS) Act (42 U.S.C. 254b). Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to HRSA Reports Clearance Officer, 5600 Fishers Lane, Room 14N136B, Rockville, Maryland, 20857 or paperwork@hrsa.gov.

**Instructions**

Form 3 collects the projected income from all sources other than this Health Center Program funding request for the **first budget year** of the proposed project. Form 3 is divided into two parts: (1) Patient Service Revenue - Program Income and (2) Other Income - Other Federal, State, Local, and Other Income.

**Part 1: Patient Service Revenue – Program Income**

Patient service revenue is income directly tied to the provision of services to health center patients. This includes services reimbursed by health insurance plans, managed care organizations, categorical grant programs (e.g., breast and cervical cancer screening), employers, and health provider organizations. Reimbursements may be based upon visits, procedures, member months, enrollees, achievement of performance goals, or other service related measures.

The program income section groups billable visits and income into the same five payer groupings used in the UDS Manual. All patient service revenue is reported in this section of the form.

Patient service revenue includes income earned from Medicaid and Medicare rate settlements and wrap reconciliations that are designed to make up the difference between the approved FQHC rate and the interim amounts received. It includes risk pool and other incentive income, as well as primary care case management fees. If you do not have an FQHC cost reimbursement rate from Medicaid and Medicare, contact your PCA for help with the application process.¹

Only include patient service revenue associated with sites and services proposed in this application.

---

¹ For a listing of HRSA-supported PCAs, refer to HRSA’s [Strategic Partnerships website](#).
Patients by Primary Medical Insurance - Column (a): The projected number of unduplicated patients classified by payer based on the patient’s primary medical insurance (payer billed first). Patients are classified in the same way as in the UDS Manual, Table 4, lines 7 – 12. Examples for determining where to count patients include:

A crossover patient with Medicare and Medicaid coverage is to be classified as a Medicare patient on line 2.

A Medicaid patient with no dental coverage who is only seen for dental services is to be classified as a Medicaid patient on line 1 with a self-pay visit on line 5.

Billable Visits – Column (b): Includes all billable/reimbursable visits. The value is typically based on assumptions about the amount of available clinician time, clinician productivity (visits per unit of time), and mix of billable visits by payer. Do not include billable services related to laboratory, pharmacy, imaging, and other ancillary services in this column. (See Ancillary Instructions under Payer Categories below.) Note other significant exclusions or additions in the Comment/Explanatory Notes section at the bottom of the form.

Note: The patient service income budget is primarily based on income per visit estimates. However, some forms of patient service income do not generate reportable visits, such as income from laboratory or pharmacy services, capitated-managed care, performance incentives, wrap payments, and cost report settlements. Based on historical experience, you may choose to include some or all of this income in the income per visit assumption. You may also choose to separately budget for some or all of these sources of patient service income.

Income per Visit – Column (c): Calculated by dividing projected income in Column (d) by billable visits in Column (b).

Projected Income – Column (d): Projected accrued net revenue, including an allowance for bad debt, from all patient services for each pay grouping. Pharmacy income may be estimated using historical data to determine the number of prescriptions per medical visit and the average income per prescription. All separate projections of income are consolidated and reported here.

Prior FY Income – Column (e): The income data from the health center’s most recent fiscal year, which will be either interim statement data or audit data, when available.

Alternative Instructions for Capitated Managed Care:

Health centers may use their own methods for budgeting patient service income other than those noted above, but must report the consolidated result in the Projected Income Column (d), along with the related data requested in Columns (a) through (e). Income for each service may be estimated by multiplying the projected visits by assumed income per visit. For example, capitated managed care income may be based on member-month enrollment projections and estimated capitation rates for

---

2 These visits will correspond closely with the visits reported on the UDS Manual Table 5, excluding enabling service visits.
each plan, grouped by payer and added to the projected income. Enter the estimated visits
associated with these managed care plans in Column (b).

Payer Categories (Lines 1 – 5): The five payer categories (Medicaid, Medicare, Other Public,
Private, and Self-Pay) reflect the five payer groupings in UDS. The UDS Manual includes definitions
for each payer category.

Visits are reported on the line of the primary payer, which is the payer billed first. When a single visit
involves more than one payer, attribute each portion of the visit income to the payer group from
which it is earned. In cases where there are deductibles and co-payments to be paid by the patient,
report that income on the self-pay line. If the co-payment is to be paid by another payer, report that
income on the other payer’s line. It is acceptable to include that income on the primary payer line, if
you cannot accurately associate the income to secondary and subsequent sources.

Ancillary Instructions: All service income is to be classified by payer, including pharmacy and other
ancillary service revenue. If you do not normally classify the projected ancillary or other service
revenue by payer category, allocate the projected income by payer group using a reasonable
method, such as the proportion of medical visits or charges. The method used should be noted in
the Comments/Explanatory Notes section at the bottom of the form.

Medicaid (Line 1): Income from FQHC cost reimbursement; capitated managed care; fee-for-service
managed care; Early Periodic Screening, Diagnosis, and Treatment (EPSDT); Children’s Health
Insurance Program (CHIP); and other reimbursement arrangements administered either directly by
the state agency or by a fiscal intermediary. It includes all projected income from managed care
capitation, settlements from FQHC cost reimbursement reconciliations, wrap-around payments,
performance incentives, pharmaceutical reimbursements, and primary care case management
income.

Medicare (Line 2): Income from the FQHC cost reimbursement, capitated managed care, fee-for-
service managed care, Medicare Advantage plans, and other reimbursement arrangements
administered either directly by Medicare or by a fiscal intermediary. It includes all projected income
from managed care capitation, settlements from the FQHC cost reimbursement reconciliations, risk
pool distributions, performance incentives, pharmaceutical reimbursements, and case management
fee income.

Other Public (Line 3): Income not reported elsewhere from federal, state, or local government
programs that is earned for providing services or pharmaceuticals that is unearned or based upon
meeting the plan’s eligibility criteria. A CHIP operated independently from the Medicaid program is
an example of other public insurance. Other Public income also includes income from categorical
grant programs when the grant income is earned by providing services (e.g., Centers for Disease
Control and Prevention’s (CDC) National Breast and Cervical Cancer Early Detection Program).

Private (Line 4): Income earned from or paid for by private insurance plans, managed care plans,
and other private contracts for services or pharmaceuticals. This includes plans such as commercial
insurance (e.g., Blue Cross and Blue Shield), managed care plans, self-insured employer plans,
group contracts with unions and employers, service contracts with employers, and Veterans Health
Administration Community Based Outpatient Clinic (CBOC) contracts. Income from health benefit plans that are earned by government employees, veterans, retirees, and dependents, such as TRICARE, the federal employee health benefits program, state employee health insurance benefit programs, teacher health insurance, and similar plans are to be classified as private insurance.

Self-Pay (Line 5): Income from patients, including full-pay, self-pay, and sliding fee patients, as well as the portion of the visit income for which an insured patient is personally responsible.

Total (Line 6): Sum of lines 1-5.

Part 2: Other Income – Other Federal, State, Local, and Other Income

This section includes all income other than the patient service revenue shown in Part 1 (exclusive of this Health Center Program funding request). It includes other federal, state, local, and other income. It is income that is earned but not directly tied to visits, procedures, or other specific services. It includes income from services provided to non-health center patients (see examples below). This would include income from in-house retail pharmacy sales to individuals who are not patients of the health center. Income is to be classified based on the source from which it was received and not the source from which it originated.

Other Federal (Line 7): Income from direct federal funds, where your organization is the recipient of an NoA directly from a federal agency. It includes funds from federal sources such as Health Center Program Covid-19 supplemental funding (grant award number begins with H8C or H8D), the CDC, Housing and Urban Development (HUD), Centers for Medicare & Medicaid Services (CMS), and Department of Health and Human Service funding under the Ryan White HIV/AIDS Program Part C, School-Based Health Center Capital grants, and others. The CMS EHR incentive program income is reported here to be consistent with the UDS Manual. Exclude this Health Center Program funding request.

State Government (Line 8): Income from state government funding, contracts, and programs, including uncompensated care funding; state indigent care income; emergency preparedness funding; mortgage assistance; capital improvement funding; school health funding; Special Supplemental Nutrition Program for Women, Infants, and Children (WIC); immunization funding; and similar awards.

Local Government (Line 9): Income from local government grants, contracts, and programs, including local indigent care income, community development block grants, capital improvement project funding, federal funding awarded through intermediaries, and similar awards. For example, include: (1) income earned under a contract with the local Department of Health to provide services to the Department’s patients, and (2) Ryan White Part A that is awarded through municipalities.

Private Grants/Contracts (Line 10): Income from private sources, such as foundations, non-profits, hospitals, nursing homes, drug companies, employers, other health centers, and similar entities. For example, if you operate a pharmacy in part for your own patients and in part as a contractor to another health center, report the pharmacy income for your own patients in Part 1 under the appropriate payer categories and the income from the contracted health center on this line.
Contributions (Line 11): Income from private entities and individual donors that may be the result of fundraising.

Other (Line 12): Incidental income not reported elsewhere, including items such as interest income, patient record fees, vending machine income, dues, and rental income. Applicants typically have at least some “other” income to report on Line 12.

Applicant (Retained Earnings) (Line 13): The amount of funds needed from your retained earnings or reserves in order to achieve a breakeven budget. Explain in the Comments/Explanatory notes section why your funds (retained earnings) are needed for this purpose. Amounts from non-federal sources, combined with this Health Center Program funding request, should typically be adequate to fully support operations.

Total Other (Line 14): The sum of lines 7 – 13.

Total Non-Federal (Line 15): The sum of Lines 6 and 14 (the total income aside from this Health Center Program funding request).

Note: In-kind donations are not included on Form 3. You may discuss in-kind donations in the SUPPORT REQUESTED section of the Project Narrative. Additionally, such donations may be included on the SF-424A (Section A: Budget Summary—Non-Federal Resources under New or Revised Budget).
