ACCESSIBLE LOCATIONS AND HOURS OF OPERATION

Primary Reviewer: Governance/Administrative Expert

Secondary Reviewer: Clinical Expert

Authority: Section 330(k)(3)(A) of the PHS Act; and 42 CFR 51c.303(a) and 42 CFR 56.303(a)

Document Checklist for Health Center Staff

Documents Provided Prior to Site Visit:

- List of health center sites, including site addresses, hours of operation by site, and information on what general services (e.g., medical, oral health, behavioral health) are offered at each service site. **Note:** these may be presented in separate documents or as references to health center websites
- Uniform Data System (UDS) Mapper Service Area Map (if updated since last application submission to HRSA/BPHC)

Documents Provided at the Start of the Site Visit:

- Patient satisfaction surveys or other forms of patient input
- Needs Assessment(s) or related studies or resources

Demonstrating Compliance

Element a: Accessible Service Sites

The health center's service site(s) are accessible to the patient population relative to where this population lives or works (for example, at migrant camps for health centers targeting agricultural workers, in areas immediately accessible to public housing for health centers targeting public housing residents, or in shelters for health centers targeting individuals experiencing homelessness). Specifically, the health center considers the following factors to ensure the accessibility of its sites:

- Access barriers (for example, barriers resulting from the area's physical characteristics, residential patterns, or economic and social groupings); and
- Distance and time taken for patients to travel to or between service sites in order to access the health center's full range of in-scope services.

Site Visit Team Methodology

- Review Service Area Map.
- Review needs assessment(s) or related studies or resources.
- Review status of any special populations funding or designation.
- Interview health center staff and board members, walking through considerations either for a) one to two sites already in scope OR b) a site added to scope within the past year.

Site Visit Findings

1. Does the health center take the following factors, including those specific to special population(s) (if applicable), into consideration in determining where to locate its sites:
 - o Access barriers (For example, the health center has considered the ways patients access health center sites?);
 YES NO
 - o Distance and time taken for patients to travel to or between service sites in order to access the health center's full range of in-scope services (For example, if some in-scope services are located only at certain sites, the health center facilitates access to these services for the entire patient population?)
 YES NO

If No was selected for any of the above, an explanation is required:

Element b: Accessible Hours of Operation

The health center's total number and scheduled hours of operation across its service sites are responsive to patient needs by facilitating the ability to schedule appointments and access the health center's full range of services within the HRSA-approved scope of project²⁴ (for example, a health center service site might offer extended evening hours 3 days a week based on input or feedback from patients who cannot miss work for appointments during normal business hours).

Site Visit Team Methodology

- Review health center's Form 5B to assess overall range of hours of operation and addresses of sites.
- Review needs assessment(s) or related studies or resources.
- Review patient satisfaction surveys or other forms of patient input.

²⁴ Services provided by a health center are defined at the awardee/designee level, not by individual site. Thus, not all services must be available at every health center service site; rather, health center patients must have reasonable access to the full complement of services offered by the center as a whole, either directly or through formal written established arrangements. For further details on scope of project, including Form 5A services and column descriptors, please see <http://www.bphc.hrsa.gov/programrequirements/scope.html>.

- Interview relevant health center staff and board members to have them provide one to two examples of how hours are responsive to patient need.

Site Visit Findings

2. Has the health center taken patient needs into consideration in setting the hours of operation of its sites (e.g., within available resources, the hours correspond to most requested appointment times or align with the most in-demand services)?
 YES NO

If No, an explanation is required:

Element c: Accurate Documentation of Sites within Scope of Project

The health center accurately records the sites in its HRSA-approved scope of project²⁵ on its Form 5B: Service Sites in HRSA's Electronic Handbooks (EHB).

Site Visit Team Methodology

- Review health center's Form 5B.
- Review latest list of site addresses provided by health center and compare to those sites listed on the most current Form 5B in EHB.
- Interview relevant health center staff.

Site Visit Findings

3. Was the health center able to attest that its Form 5B is an accurate reflection of all active sites in scope?
 YES NO

If No, an explanation is required, including specifying whether the health center can document that any necessary change in scope requests have been submitted to HRSA (e.g., request to delete an inactive site has been submitted via EHB):

²⁵ In accordance with 45 CFR 75.308(c)(1)(i), health centers must request prior approval from HRSA for a "Change in the scope or the objective of the project or program (even if there is no associated budget revision requiring prior written approval)." This prior approval requirement applies to the addition, deletion, or replacement of a service site. These changes require prior approval from HRSA and must be submitted by the health center as a formal change in scope request. For further details on scope of project, please see <http://www.bphc.hrsa.gov/programrequirements/scope.html>.
