Is this a Look-Alike Site Visit?

Element a: Financial Management and Internal Control Systems

The health center has and utilizes a financial management and internal control system that reflects Generally Accepted Accounting Principles (GAAP) for private non-profit health centers or Government Accounting Standards Board (GASB) principles for public agency health centers and that ensures at a minimum:

- Health center expenditures are consistent with the HRSA-approved total budget and with any additional applicable HRSA approvals that have been requested and received;
- Effective control over, and accountability for, all funds, property, and other assets associated with the Health Center Program project;
- The safeguarding of all assets to assure they are used solely for authorized purposes in accordance with the terms and conditions of the Health Center Program award/designation; and
- The capacity to track the financial performance of the health center, including identification of trends or conditions that may warrant action by the organization to maintain financial stability.

Site Visit Team Methodology

- Interview health center’s CFO and/or other relevant staff and, if applicable, contractors who have responsibility for the health center’s financial management systems.
- Review the two most recent audits and management letters.
- Review financial management, accounting, and internal control procedures and systems.

---

1 GAAP and GASB are used as defined in 45 CFR Part 75.
2 A health center’s “total budget” includes the Health Center Program federal award funds and all other sources of revenue in support of the HRSA-approved Health Center Program scope of project. For additional detail, see [Health Center Program Compliance Manual] Chapter 17: Budget.
3 Per 45 CFR 75.308, post-award, federal award recipients are required to report significant deviations from budget or project scope or objective, and are required to request prior approvals from HHS awarding agencies for budget and program plan revisions (re-budgeting). “Re-budgeting, or moving funds between direct cost budget categories in an approved budget, is considered significant when cumulative transfers for a single budget period exceeds 25 percent of the total approved budget (inclusive of direct and indirect costs and federal funds and required matching or cost sharing). The base used for determining significant re-budgeting excludes carryover balances but includes any amounts awarded as supplements.”
4 The requirement to safeguard federal assets as described in this bullet substantially reflects the requirement to have written policies and procedures in place to ensure the appropriate use of federal funds in compliance with applicable federal statutes, regulations, and the terms and conditions of the federal award. See Section 330(k)(3)(N) of the PHS Act.
