FORMULATION OF RECOMMENDATIONS TO THE SECRETARY

Ideas

• Lack of language capacity
• Lack of access to care, models that do not work, hours of service
• Lack of enforcement of related department policies (housing, field sanitation, etc.)
• Lack of culturally competent service (potential misdiagnosis, potential outbreak of disease, potential infection of food supply)
• Safety net may be disappearing under the assumption that all will be insured (specialty care, hospitalization)

Solution ideas

• Request re-working of accountability system to ensure the intended purpose for MSFW is met
• ACA - in order to ensure that health care disparities for MSFW is not exacerbated by ACA implementation, HRSA needs to establish an approach to collect impact data to address issues as they arise

Highlights from Testimony

• Quality of care
• Not receiving care
• Behavioral health
• Affordability of co-pay
• Cultural competency
• Loss of focus on MSFW
• Enabling services (transportation outreach, interpretation education)
• Logistical mismatch (hours, mobile units, location, transportation)
• Interagency coordination
• Specialty care
• Violence-domestic/women, trafficking, sexual harassment, employment-related
• Other women’s issues
• Literacy needs
• Adult immunizations/Adult cancer screen
• ACA services available to MSFW (clinical quality of care is equal)
RECOMMENDATIONS FOR LETTER

- Focus on vulnerabilities of populations (accountability to MSFW populations, creative models of care)
- Outreach/enabling (translators, transportation)
- Access and quality (not lost in ACA process, clinical quality, equality and access)
- Accountability (system of integrated accountability)
- Specialty care (currently no programs to address funding mechanism)
- Dental care for adults (prevention re: kids)
- Social determinants of health (housing conditions)
- Accountability (Plus); MSFW funding=MSFW Services, therefore application process should include a requirement to address enabling services needs or justify why not offering
- ACA rollout and impact on MSFW; important to be aware of issues and not create second class services for MSFW
- Ethical and moral obligation if receiving MSFW funding-need to document provision of services which meet needs of the population
- Choices we make are determined by the choices we have before us
- Health literacy (self-management goal)
- Provider recruitment commit to NHSC (possibly extend requirement for service)
- Interagency collaboration, possible shared definition (HUD, FHA)
- Comprehensive/Specialty Care (same benefits to MSFW as available to eligible ACA clients)
- Health of MSFW’s potentially impact overall health
- Public health is a national security issue
- Lack of updated immigration policy impacts public health access to services, availability of workers
